Navigating Decarbonisation:

Protecting Queensland's Agricultural Advantage

Kylie Porter | CEO | Queensland Farmers' Federation

29 September 2026

Four Key Themes:

- Diversity of agriculture
- The limits of resilience
- The weight of regulation
- Increasing competition for high value agricultural land

Farmers need:

1. Better planning instead of relying on resilience
2. Less complexity, not more so agribusinesses can invest with confidence
3. Protection for the productive land that underpins our food security and regional prosperity
